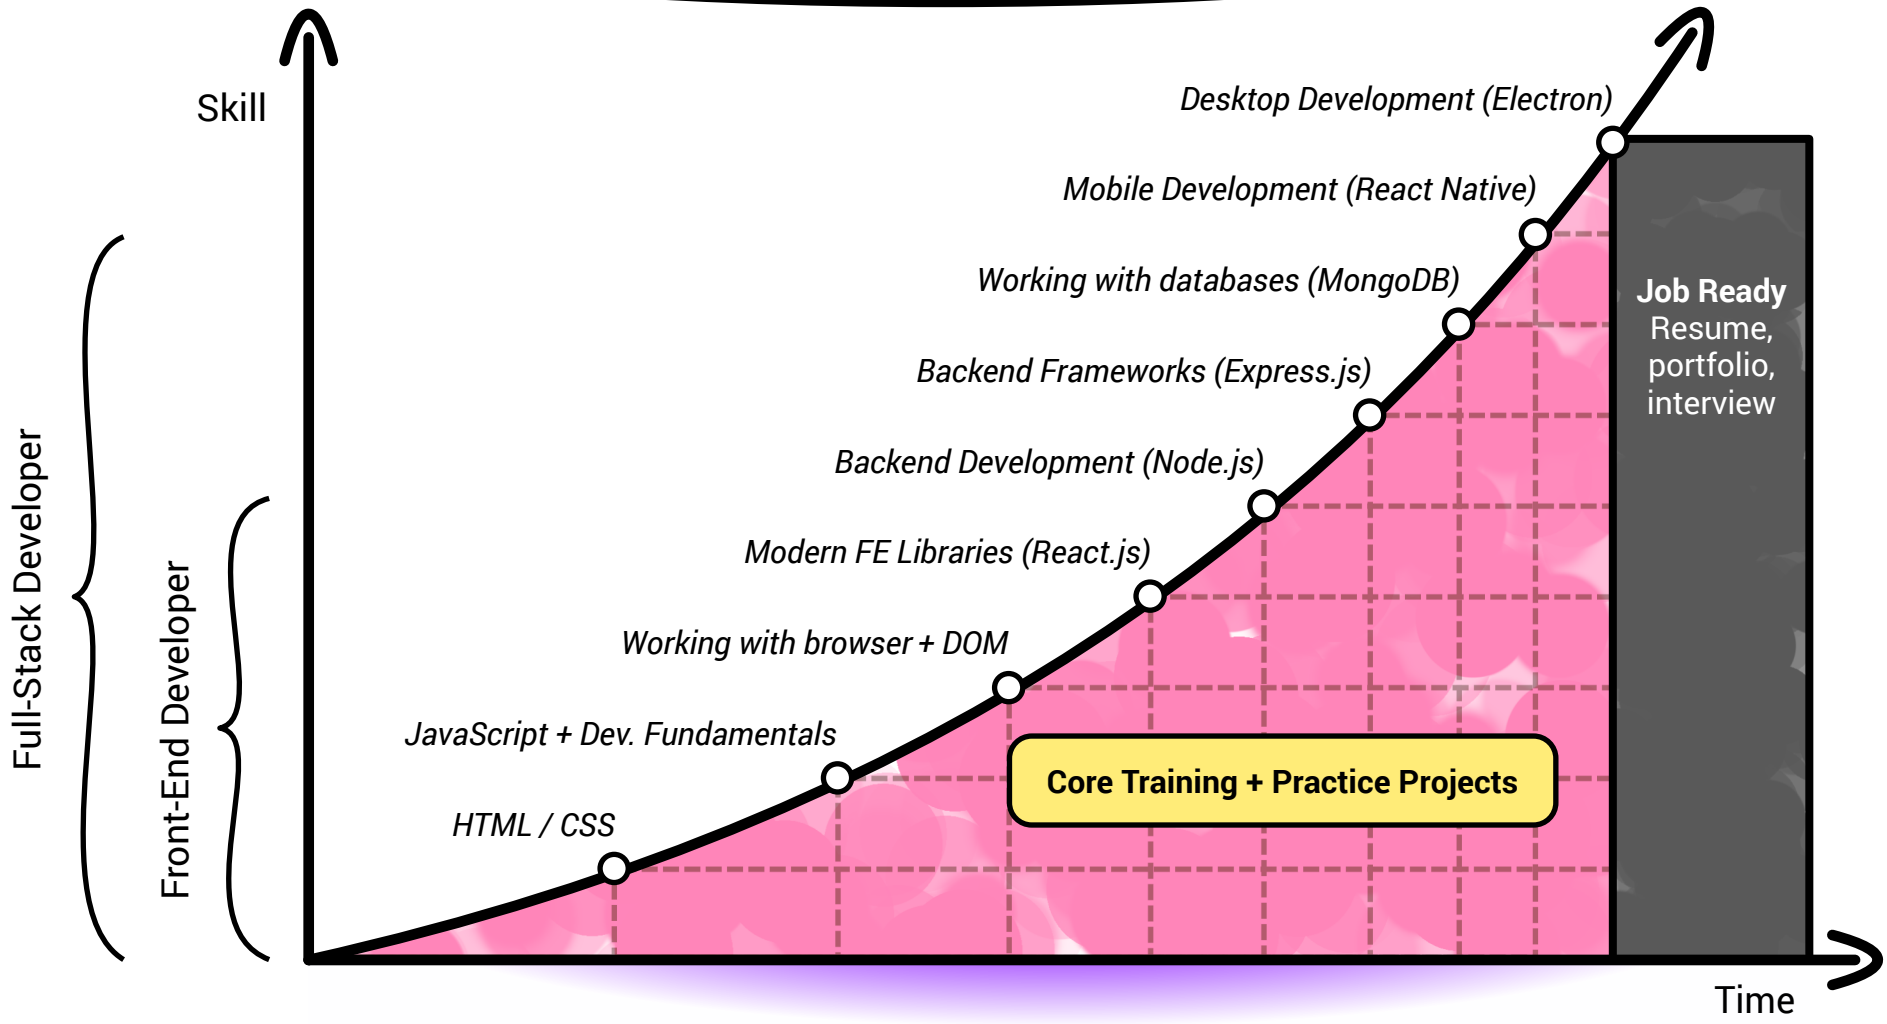
SKILL ROADMAP:

Front-End / Full-Stack Developer



(FE) Front-End Developer

FE Developers build fully-functional website user interfaces. Their job is to make web apps look beautiful and function smoothly. FE Devs primarily work with HTML, CSS, JavaScript, browsers and their related libraries.

(FS) Full-Stack Developer

FE + Backend = FS Full-Stack Devs are capable of building fully-functional FE and backend applications. FS devs primarily work with FE technology and at least one backend technology.

Additional Technologies

HTTP ~ API ~ FTP ~ Domain ~ Hosting ~ Servers ~ Responsive Design ~ Single Page Application ~ Command Line ~ Authentication ~ Git / Github ~ NPM ~ AJAX ~ etc.
